BuddyPress Theme

CUSTOM POST TYPES AND PAGE TEMPLATES IN PERFECT HARMONY

WPMU DEV
Extending WordPress, WPMU & BuddyPress

Gallery is designed to showcase images... they could be photographs, paintings, products, services, even portfolio items - as the name suggests a gallery but a gallery can be of anything.

Want the ultimate flexible Gallery theme?
Want to have the option of a page gallery template or custom post types?
Want 11 styles and the ability to easily create your own Gallery style?
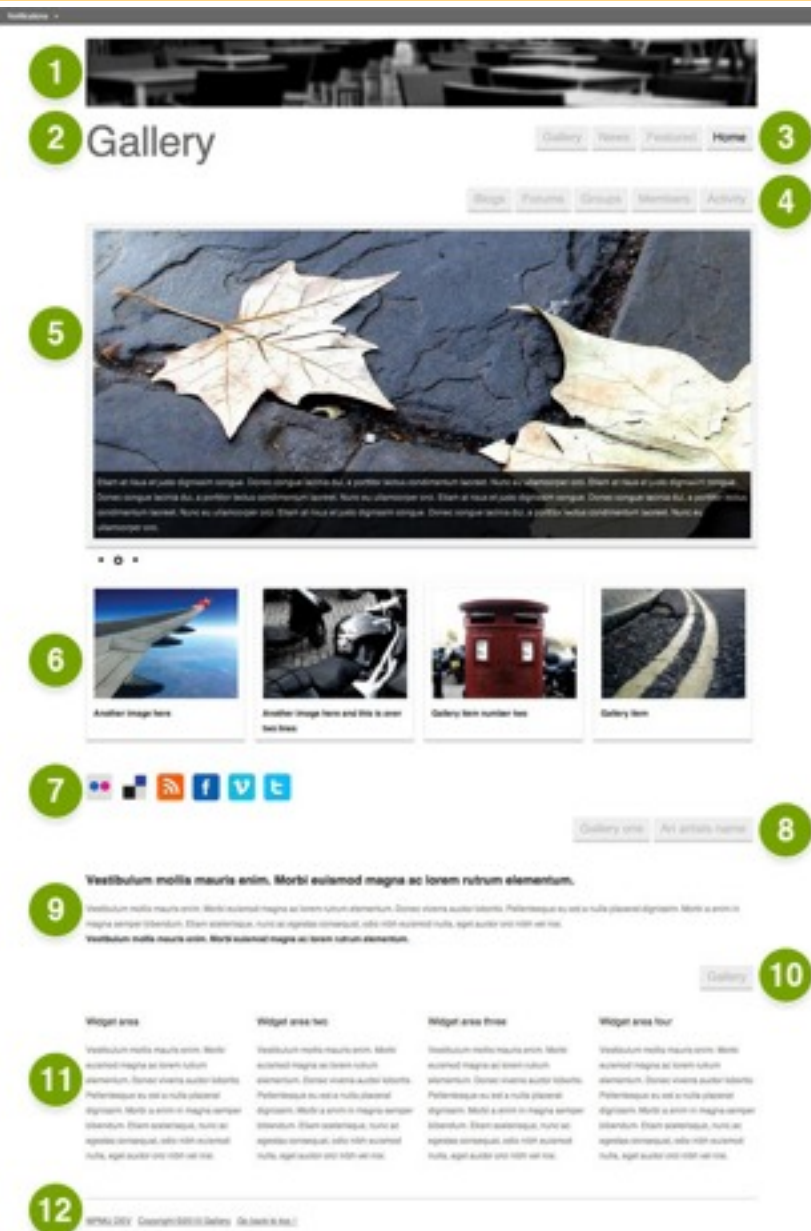

THEME OPTIONS

We are now going to show you using this image the tabs under theme options and what they relate to on the front page.

These are the tabs under appearance > theme options

TABS

1 - Custom header
2 - Branding - add a logo, image or text
3 - Primary menu
4 - Secondary BuddyPress menu
5 - Slideshow
6 - Grid view : turn on / off, set to have a link
7 - Social buttons
8 - Gallery category navigation
9 - Content
10 - Gallery menu
11 - Widgets
12 - Footer links

Home Builder is the first tab under theme options and the place where you set up everything for the home page.

GALLERY FAQ

HOW DO I CHANGE THE MESSAGES THAT APPEAR ON PAGES LIKE ARCHIVES AND SEARCH PAGES?

Gallery has a range of files under library/components and one of these is messages.php this is what you edit to change messages. Under the same directory headers.php is what you change for headers.

WHAT IS A PARENT AND CHILD THEME FOR BUDDYPRESS?

We also provide child themes with all of our themes which enable you to customize your own files without having those changes overwritten when we update a theme. To find out more about parent and children themes please visit http://premium.wpmudev.org/the-buddypress-manual/what-are-parent-and-child-themes/.

If you are using a child theme you need not activate the parent just activate the child theme. Remember to check each new version of the theme for any changes in your child theme that may have been done in the parent. Also when you update a theme just do not update the child only update the parent and all your changes will be kept.

INSTALLING THE THEME

1. Unzip the downloaded zip file
2. You should see several files and folders depending on your theme package
3. Upload the entire Gallery/ folder to wp-content/themes/
4. Login to your dashboard >> Appearance and activate the theme - if you using WPMU, you need to go to site admin and activate the theme before it shows in Appearance
5. Your theme should be now be activated and ready for use

*Make sure your install path is themes/ not themes/themes/thethemename/

For this theme under wp-content/themes/ you should have:
Gallery/
Gallery-child/

HOW DO I ADD A FAVICON?

Gallery is already set to link to a favicon all you have to do is put one in either your parent or child theme under the stylesheet directory and it must be called favicon.ico - if you are using a child remember the favicon should be under your child theme style directory.

Should you wish to remove the call to the favicon automatically just edit header.php and remove the following line 54:

<link rel="icon" href="<?php bloginfo('stylesheet_directory');?>/favicon.ico" type="images/x-icon" />

GALLERY FAQ

How do I add a gallery?

You have 2 options:
1. BASIC : Use a page template and the built in galleries with WordPress
2. ADVANCED : Use custom post types and create galleries and images - only way to create slideshow

BASIC: How do I use the gallery page template?

1. Create a new page
2. Under page templates select gallery
3. Click add images under the editor (page editor) then upload images you want to be in gallery and add gallery
4. Save the page

ADVANCED: How do I use the gallery custom post type?

1. Click **Add New** under the Gallery Image menu
2. You will now see the add new gallery post screen which is a modified post screen
3. Add a title and caption
4. Link to a gallery - galleries are similar to categories for your images
5. Under Gallery Image Setup now decide if you want to have the image show in the slideshow or not
6. Set a small image to show in the grid view
7. Set a image to show when the small image is clicked under the Popup layer image upload option
8. Next depending on if you have a partial or full width slideshow set put an image in for the slideshow
9. Save your image and you're all set

How do I add a category to my gallery items

1. Click **Galleries** under the Gallery Images menu
2. Add a category

How do I change the design?
